## Part I Scilab

---

<b>1 General Information</b> . . . . .	3
1.1 What Is Scilab? . . . . .	3
1.2 How to Start? . . . . .	4
1.2.1 Installation . . . . .	4
1.2.2 First Steps . . . . .	4
1.2.3 Line Editor . . . . .	5
1.2.4 Documentation . . . . .	6
1.3 Typical Usage . . . . .	6
1.4 ScicosLab on the Web . . . . .	7
<b>2 Introduction to Scilab</b> . . . . .	9
2.1 Scilab Objects . . . . .	11
2.1.1 Matrix Construction and Manipulation . . . . .	12
2.1.2 Strings . . . . .	17
2.1.3 Boolean Matrices . . . . .	19
2.1.4 Polynomial Matrices . . . . .	20
2.1.5 Sparse Matrices . . . . .	21
2.1.6 Lists . . . . .	22
2.1.7 Functions . . . . .	26
2.2 Scilab Programming . . . . .	27
2.2.1 Branching . . . . .	28
2.2.2 Iterations . . . . .	29
2.2.3 Scilab Functions . . . . .	31
2.2.4 Debugging Programs . . . . .	35
2.3 Input and Output Functions . . . . .	37
2.3.1 Display of Variables . . . . .	37
2.3.2 Formatted Input and Output . . . . .	38
2.3.3 Input Output in Binary Mode . . . . .	41
2.3.4 Accessing the Host System . . . . .	42
2.3.5 Graphical User Interface . . . . .	43
2.4 Scilab Graphics . . . . .	48
2.4.1 Basic Graphing . . . . .	48
2.4.2 Graphic Tour . . . . .	50
2.4.3 Graphics Objects . . . . .	53

## VIII Contents

2.4.4	Scilab Graphics and L <sup>A</sup> T <sub>E</sub> X . . . . .	56
2.4.5	Old Graphics Style . . . . .	60
2.5	Interfacing . . . . .	63
2.5.1	Linking Code . . . . .	63
2.5.2	Writing an Interface . . . . .	66
2.5.3	Dynamic Loading . . . . .	69
<b>3</b>	<b>Modeling and Simulation in Scilab . . . . .</b>	<b>73</b>
3.1	Types of Models . . . . .	73
3.1.1	Ordinary Differential Equations . . . . .	73
3.1.2	Boundary Value Problems . . . . .	74
3.1.3	Difference Equations . . . . .	75
3.1.4	Differential Algebraic Equations . . . . .	76
3.1.5	Hybrid Systems . . . . .	77
3.2	Simulation Tools . . . . .	78
3.2.1	Ordinary Differential Equations . . . . .	78
3.2.2	Boundary Value Problems . . . . .	90
3.2.3	Difference Equations . . . . .	95
3.2.4	Differential Algebraic Equations . . . . .	98
3.2.5	Hybrid Systems . . . . .	101
<b>4</b>	<b>Optimization . . . . .</b>	<b>107</b>
4.1	Comments on Optimization and Solving Nonlinear Equations . . . . .	107
4.2	General Optimization . . . . .	108
4.3	Solving Nonlinear Equations . . . . .	112
4.4	Nonlinear Least Squares . . . . .	113
4.5	Parameter Fitting . . . . .	117
4.6	Linear and Quadratic Programming . . . . .	119
4.6.1	Linear Programs . . . . .	119
4.6.2	Quadratic Programs . . . . .	120
4.6.3	Semidefinite Programs . . . . .	120
4.7	Differentiation Utilities . . . . .	120
4.7.1	Higher Derivatives . . . . .	122
<b>5</b>	<b>Examples . . . . .</b>	<b>125</b>
5.1	Modeling and Simulation of an <i>N</i> -Link Pendulum . . . . .	125
5.1.1	Equations of Motion of the <i>N</i> -Link Pendulum . . . . .	126
5.1.2	Generated Code and Simulation . . . . .	130
5.1.3	Maple Code . . . . .	133
5.2	Modeling and Simulation of a Car . . . . .	135
5.2.1	Basic Model . . . . .	135
5.2.2	Equations of Motion . . . . .	136
5.2.3	Simulation Model . . . . .	138
5.2.4	Scilab Implementation . . . . .	139
5.2.5	Simulation Result . . . . .	141
5.3	Open-Loop Control to Swing Up a Pendulum . . . . .	142
5.3.1	Model . . . . .	142
5.3.2	Control Problem Formulation . . . . .	142
5.3.3	Optimization Problem . . . . .	143
5.3.4	Implementation in Scilab . . . . .	145

5.4	Parameter Fitting and Implicit Models . . . . .	147
5.4.1	Mathematical Model . . . . .	148
5.4.2	Scilab Implementation . . . . .	148
<hr/>		
<b>Part II Scicos</b>		
<b>6</b>	<b>Introduction . . . . .</b>	<b>159</b>
<b>7</b>	<b>Getting Started . . . . .</b>	<b>163</b>
7.1	Construction of a Simple Diagram . . . . .	163
7.1.1	Running Scicos . . . . .	163
7.1.2	Editing a Model . . . . .	163
7.1.3	Diagram Simulation . . . . .	166
7.1.4	Changing Block Parameters . . . . .	167
7.2	Symbolic Parameters and Context . . . . .	170
7.3	Virtual blocks and Hierarchy . . . . .	173
7.3.1	Placing a Super Block in a Diagram . . . . .	174
7.3.2	Editing a Super Block . . . . .	174
7.3.3	Scope of Variables in Super Block Contexts and Masking . . . . .	176
7.4	Save and Load Operations . . . . .	178
7.4.1	Scicos File Formats . . . . .	178
7.4.2	Super Block and Palette . . . . .	178
7.5	Synchronism and Special Blocks . . . . .	179
<b>8</b>	<b>Scicos Formalism . . . . .</b>	<b>183</b>
8.1	Activation Signal . . . . .	183
8.1.1	Block Activation . . . . .	183
8.1.2	Activation Generation . . . . .	185
8.2	Inheritance . . . . .	186
8.3	Always Active Blocks . . . . .	187
8.4	Constant Blocks . . . . .	188
8.5	Conditional Blocks . . . . .	188
<b>9</b>	<b>Scicos Blocks . . . . .</b>	<b>193</b>
9.1	Block Behavior . . . . .	193
9.1.1	External Activation . . . . .	193
9.1.2	Always Activation . . . . .	196
9.1.3	Internal Zero-Crossing . . . . .	196
9.2	Blocks Inside Palettes . . . . .	196
9.3	Modifying Block Parameters . . . . .	197
9.4	Super Block and Scifunc . . . . .	197
9.4.1	Super Blocks . . . . .	198
9.4.2	Scifunc . . . . .	198
9.5	Constructing New Basic Blocks . . . . .	198
9.5.1	Interfacing Function . . . . .	199
9.5.2	Computational Function . . . . .	201
9.5.3	Saving New Blocks . . . . .	216
9.6	Constructing and Loading a New Palette . . . . .	216

<b>10 Examples and Applications</b>	219
10.1 Academic examples	219
10.1.1 Predator Prey Model	219
10.1.2 Control Application	222
10.1.3 Signal Processing Application	223
10.1.4 Queuing Systems	226
10.1.5 Neuroscience Application	228
10.1.6 A Fluid Model of TCP-Like Behavior	230
10.1.7 Interactive GUI	231
10.2 Applications	235
<b>11 Batch Processing in Scilab</b>	239
11.1 Piloting Scicos via Scilab Commands	239
11.1.1 Function <code>scicosim</code>	240
11.1.2 Function <code>scicos_simulate</code>	244
11.2 Data Sharing	246
11.2.1 Context Variables	246
11.2.2 Input/Output Files	246
11.2.3 Special blocks: <code>From Workspace</code> and <code>To Workspace</code>	249
11.3 Steady-State Solution and Linearization	255
11.3.1 Scilab Function <code>steadycos</code>	257
11.3.2 Scilab Function <code>lincos</code>	258
<b>12 Code Generation</b>	263
12.1 Code Generation Procedure	263
12.2 Limitations	267
12.2.1 Continuous-Time Activation	267
12.2.2 Synchronicism	268
12.3 A Look Inside	268
12.4 Some Pitfalls	270
12.5 Applications	273
<b>13 Debugging</b>	277
13.1 Error Messages	277
13.1.1 Block Errors	277
13.1.2 Errors During Numerical Integration	278
13.1.3 Other Errors	279
13.2 Debugging Tools	279
13.3 Examples	280
13.3.1 Log File	281
13.3.2 Animation	281
<b>14 Implicit Scicos and Modelica</b>	283
14.1 Introduction	283
14.2 Internally Implicit Blocks	285
14.3 Implicit Blocks	286
14.3.1 Scicos Editor	286
14.3.2 Scicos Compiler	286
14.3.3 Block Construction	287
14.4 Example	289

14.5 Scicos Block MBlock .....	290
14.6 Initialization .....	292
14.6.1 Example .....	293
<b>A Inside Scicos .....</b>	<b>297</b>
A.1 Scicos Editor .....	297
A.1.1 Main Editor Function .....	297
A.1.2 Structure of <code>scs.m</code> .....	300
A.2 Scicos Complier .....	303
A.2.1 First Compilation Stage .....	303
A.2.2 Second Compilation Stage .....	304
A.2.3 Structure of <code>%cpr</code> .....	304
A.2.4 Partial Compilation .....	307
A.3 Scicos Simulator .....	308
<b>B Coding Examples .....</b>	<b>309</b>
B.1 Scicos Blocks of Type 5 .....	309
B.1.1 Type 5 Block for the Bouncing Ball Example .....	309
B.1.2 Animation Block for the Cart Pendulum Example .....	310
B.2 Animation Program for the Car Example .....	314
B.3 Extraction Program for the L <sup>A</sup> T <sub>E</sub> X Graphic Example .....	315
B.4 Maple Code Used for Modeling the <i>N</i> -Link Pendulum .....	316
<b>References .....</b>	<b>321</b>
<b>Index .....</b>	<b>325</b>
